Profile

I'm applying for a position as a backend/full-stack developer. In the work process, I value good code, friendly colleagues and a disciplined routine. I'm looking forward to your response.

Experience

2025 - Present
SW Development

Full stack developer

Integrated Telegram Mini Apps (TMA) with Laravel backends, utilizing Web App API for seamless user authentication, theme synchronization, and real-time data exchange.

2024 - 2025
AML Incubator

Full stack developer

Web Developer with expertise in VPS deployment and full-stack solutions. Delivered complex platforms featuring advanced admin panels, bulk messaging, and corporate sites with integrated training systems.

2023 - 2024
Webex Technologies

Back end developer

Migrated a legacy PHP 5.2 project to Laravel 10, preserving full functionality and the original database schema.

2021 - 2023
EliteDevSquad

Full stack developer

Worked on many projects, Dating site with geolocation integrations, Tools for HR specialists, Program tracker for calculating employee time...
